Environmental Policy

Transcar Projects Limited and its divisions, subsidiaries and affiliates consider that the environmental management and the prevention of pollution complies with the requirements of ISO 14001 Environmental Management Systems is an integral part of our business and aims to achieve continuous improvements in environmental performance by:

- Keeping abreast of and complying with legislation, regulations and codes of practice on environmental matters relevant to our business.
- Reducing the environment impacts of our activities by identification of significant environmental impacts and adopting reasonable controls.
- Setting annual environmental objectives and targets, and monitoring performance against these objectives and targets.
- Making use of opportunities to minimize waste and to reuse or recycle materials.
- Communicating our environmental policies, plans and performance to our employees, employers and the public.
- Training our employees and promoting environmental awareness and commitment.

To help achieve a reduction in its Carbon Footprint, Transcar Projects has committed to:-

- Act responsibly, respecting the environmental legislation in all the countries where it operates or executes projects and/or will implement the project specific actions, seeking to meet or exceed the legislative project targets at all times.
- Promote environmental awareness and responsibility amongst its staff and contractors involved in the work and their proactive roles in respect of the development of a culture oriented to quality and environmental protection.
- Integrate its environmental goals within all aspects of the decision-making processes.
- Reduce the environmental impacts of all work-related functions, with particular attention to the promotion of energy saving for natural resources such as paper, water, electricity and fuel.
- Actively promote “video conferencing” as an alternative, to reduce the need for travel.
- Utilise public transportation, where applicable, else adopting a vehicle sharing policy for any meetings or related project activities.
- Minimize waste, promote recycling, and the use of recycled products to help reduce the amount of waste sent to landfill.

- Adopt a sustainable sourcing and purchasing policy.
- Ensure the correct application of any technologies used for the execution of any given work-scope and, where possible, pursue the improvement of these technologies in terms of environmental protection.
- Where possible, choose technologies and methods which eliminate or reduce the use of hazardous substances to humans of the environment.
- Promote and utilise services that actively seek to operate with carbon reducing equipment or with as little packaging as possible.
- Reduce the paper printing, replacing printed documents with paperless documents to be shared on-line on the platform chosen for the data management, and making them accessible also through mobiles devices.

Transcar Projects as an organisation is dependent on the commitment and involvement of all employees.

Transcar Projects will utilise a systematic approach to ensure compliance with all local environmental laws and regulations that apply to its activities.

Transcar Projects aims to play a leading role in setting and promoting best environmental practice in the freight forwarding industry.

Transcar Projects expects employees, contractors and visitors to sites owned or operated by the company to show a similar level of commitment by adhering to established procedures and relevant project safety plans.

Transcar Projects will include consideration of environmental commitment, Impact and performance when selecting contractors and vendors.

This policy shall be implemented through a documented HSSE management system. The management system shall ensure that objectives are set, hazards are identified, risks assessed and control measures implemented in a systematic manner.

This Environmental policy, HSSE management systems, procedures and objectives will be regularly reviewed to identify and implement practicable improvements, which will promote continued HSSE performance improvement.
